Instructor: Brian N. Popp, E-mail: popp@hawaii.edu, Office: POST 720, 956-6206

This online course requires students to be skilled in the use of the Internet. We will communicate mainly through Wiley Engage where you will access the textbook as well as linked videos on YouTube and other outlets, along with the instructor's video lecture recordings. All homework, exams and readings will be through the Wiley Engage web site. We will also occasionally use Laulima.

Student Learning Objectives

The **Department of Earth Sciences** has established the following undergraduate student learning objectives. Keep especially objectives 1, 3, and 5 in mind as overarching targets of our curriculum in GG101.

1. Students can explain the relevance of geology and geophysics to human needs, including those appropriate to Hawaii, and be able to discuss issues related to geology and its impact on society and planet Earth.
2. Students can apply technical knowledge of relevant computer applications, laboratory methods, and field methods to solve real-world problems in geology and geophysics.
3. Students use the scientific method to define, critically analyze, and solve a problem in earth science.
4. Students can reconstruct, clearly and ethically, geological knowledge in both oral presentations and written reports.
5. Students can evaluate, interpret, and summarize the basic principles of geology and geophysics, including the fundamental tenets of the sub-disciplines, and their context in relationship to other core sciences, to explain complex phenomena in geology and geophysics.
