GG101  Dynamic Earth  Spring 2020

I. Instructor

Dr. Terry Naumann  
E-mail: tnaumann@hawaii.edu  
Office location: St George, Utah usually!

This is an online course that requires students to be fairly skilled in the use of the Internet. We will be communicating using UH’s course software Laulima, through which you will access and submit all course materials. Through Laulima you will also watch linked videos on YouTube and other outlets, along with the instructor’s video lecture recordings.

For more information on how this course will work check out the "Start Here" module in the Laulima course shell.

II. Text  Physical Geology 2nd Edition  (C. Fletcher)

I highly recommend that you should buy, rent, borrow or share a copy of this book. All of the content in the video lectures and more can be found in this book.

III. Office Hours

If you have questions or concerns just email me and I always respond as quickly as I can.

I will “officially” be able to answer emails 5x/week: Monday through Friday until 7 pm (HI time). If you have emailed me and haven’t received an immediate reply, please be patient before you try me again. I will respond, I promise! Normally I may be able to get back to you very quickly.

IV. Course Technologies and Equipment

This course uses Laulima. If you are new to Laulima, you can follow this link to the Laulima Support for Student help page. During the semester, if technology questions arise, call the Information Technology Services (ITS) at (808) 956-8853 or Toll Free (800)-558-2669.

You can also click on the “Help” button in the Laulima course shell and it will connect you to helpful resources to get you through just about any issue.

Since we will only communicate using Laulima and email you will need to use your UH student email. I may be able to respond to your personal email but when I send you a message it will be to your UH account.

V. Course Description

(From the UH course catalog): The natural physical environment; the landscape; rocks and minerals, rivers and oceans; volcanism, earthquakes, and other processes inside the Earth; effects of human use of the Earth and its resources.
VI. Course Objectives

To present you with a well-rounded introduction of how the Earth works and how its processes shape the landscape and impact your lives. This course satisfies the General Education Requirement (GER) so by design it is meant to cover a wide range of applicable topics to help make you a well-rounded citizen of planet Earth! At the completion of the course you will have a general understanding of your planet's physical processes both on the surface and in the interior.

VII. Student Learning Objectives

The Department of Earth Sciences has established the following undergraduate student learning objectives.

- Students can explain the relevance of geology and geophysics to human needs, including those appropriate to Hawaii, and be able to discuss issues related to geology and its impact on society and planet Earth.
- Students can apply technical knowledge of relevant computer applications, laboratory methods, and field methods to solve real-world problems in geology and geophysics.
- Students use the scientific method to define, critically analyze, and solve a problem in earth science.
- Students can reconstruct, clearly and ethically, geological knowledge in both oral presentations and written reports.
- Students can evaluate, interpret, and summarize the basic principles of geology and geophysics, including the fundamental tenets of the sub-disciplines, and their context in relationship to other core sciences, to explain complex phenomena in geology and geophysics.

VIII. Class participation:

Be sure to always read the Laulima Announcements to enhance your participation and stay current.

- **Students are expected to watch the presentations on Laulima, read the assigned readings, and complete all assignments on time.**
- Students are expected to read the assigned sections in the text and any other sources provided.
- Students are expected to ask relevant questions.
- Pay attention to announcements and course documents posted on Laulima.
- The instructor will send emails to individual students. **You must use your UH email account or make sure it is forwarded to other accounts if you use them. The instructor takes no responsibility if you fail to check your UH email account.**
- Students enrolled in this online class are expected to keep up with all assignments on a timely basis.

**Please note:** for any email you send me, please remember that I get a lot of emails so please include in the subject line: your full name, course name (GG101), and the topic of your email (e.g. Valentino Rossi GG101 Streams Learning Module Quiz). If you just sign off with “KC” and the email came from awesomestudent@hawaii.com I won’t be able to figure out who it is! Keep to one topic (the one indicated in the subject line) in your discussion. End with your full name since other students may have your same first name.
IX. Types of Assignments

- Watch the video lecture and any other videos I have posted
- Chapter Readings (usually the textbook but I could post other stuff too)
- Quizzes based on the module topics
- Mid-term exams

NOTE: Please read this section carefully and completely!

Late Work will NEVER be accepted and I cannot extend the deadlines for any reason. Since you will be submitting all your assignments through Laulima, missing the weekly deadlines for assignments for any reason results in an automatic zero. You will always have over a full week to complete the weekly lecture modules, quizzes and exams but when the final submission time passes there will be nothing I can do to help you. This also applies if you elect to wait until the last minute to complete the work and then have a sudden life crisis or a computer issue. Get your work done well before the deadline and your life (and mine!) will be smooth.

Ok, so you got it??? Assignments, quizzes and exams may NOT be made up later than the due date so please do not ask. All the due dates and times are listed in the syllabus.

X. Network Outage Plan

Since this is an online course it relies heavily on the Internet and having a good Internet connection. Your quizzes and exams are taken over the Internet so make sure you are somewhere with a good connection. Occasionally there are internal problems with UH’s network or Laulima. Usually these problems are temporary and your quizzes and exams will not be affected. More often than not there are external problems with your Internet service or your connection. For this reason I would suggest that you get your assignments completed well before the deadline approaches on the due date and time. If you have issues taking a quiz or exam, and it is NOT within two hours of the deadline, I will always happily reset a quiz or exam for you. Just email me and will respond as promptly as I can. However, if it is within two hours of the deadline there may not be time for me to respond and you will not get a second chance. Just to be clear, you will normally have over seven days to complete your assignments. If you elect to complete them at the last minute and something goes wrong with your life or your Internet connection then I may not be able to reset your quiz or exam.

XI. Course Evaluation and Assessment:

Students will be final grades will be based on the total number of points received from weekly assignments, quizzes, and exams. To grade assignments, I must be able to read and understand them. Spelling, rules of English composition and legibility will count in grading. Note: plagiarism and/or cheating will result with an F for the test or assignment.

Grading Scale:

A=90-100%,  B=80-89.99%,  C=70-79.99%,  D=60-69.99%,  F=Less than 60%
XII: Audit Policy:

There are no requirements to auditing this class if you decide to change later in the semester.

XIII: Plagiarism and cheating policy:

As per university policy: Academic integrity is a basic principal that requires all students to take credit for the ideas and efforts that are their own. Cheating, plagiarism, and other forms of academic dishonesty are defined as the submission of materials in assignment, exams, or other academic work that is based on sources prohibited by the faculty member. Academic dishonesty is defined further in the “Student Code of Conduct.” In addition to any adverse academic action, which may result from the academically dishonest behavior, the University specifically reserves the right to address and sanction the conduct involved through student judicial review procedures and the Academic Dispute Resolution Procedure specified in the University catalogue.

XIV. Protocols for Communicating with your Instructor and other Students Via the Internet:

- The most important rule of communicating electronically is, “Think before you post!”
- **Send emails from an educational or a military account only. The instructor will not respond to any other email addresses (I get a lot of spam so messages I receive from addresses I don’t recognize I delete immediately.**
- In the subject line of emails indicate who you are, which class you’re in and what the content of the email is, for example “Kelsey Jones, GG101: question on Chap 3 about Mantle Melting”.
- Use appropriate greetings, “Hello Dr. Naumann or Dr. T” (not “Yo”),
- **Sign off with your full name at the end of your email. Believe it or not, I may not recognize you if you just put “Chuckie”**.
- Emailing, messaging and posting on discussion boards in academia are different from emailing buddies and posting in newsgroups. You have to be courteous at all times, e.g. “I would like to ask…”. People are easily offended and take things the wrong way. If you have any question that what you are sending may not be ok, have somebody else read it first.
- Email doesn't have the subtleties of spoken or face-to-face conversation, and it's remarkably easy to be misunderstood or to offend someone. Therefore stay polite, “I have been working on this assignment for the past 2 hours – but am not getting any further. I like you to give me some advice.” Be nice.
- Assume that the instructor is willing to help you with problems, “Dr. Naumann, please get back with me at your earliest convenience.” Hence intend to post using positive language. I am here to help you.
- Avoid internet slang such as btw (by the way), l8r (later), addy (address). Write in whole sentences with proper punctuation, grammar and spelling. Don’t make it difficult for me to understand.
- If you are referring to a previous email, post, or textbook passage, include and quote the reference properly. It makes it more convenient for the instructor to be reminded of the original content and to not have to search for the original.
- If you believe someone has violated these procedures, do not post a follow-up to the offending post. Send a private email to your instructor about the violation and let the instructor handle the situation. Do not try to resolve it on your own. Be polite.
- Do not use all caps and do not use exclamation points. THAT’S LIKE SHOUTING!!!!!!
• Do not presume someone received your email – errors do occur. If it is an assignment or an important question, send it ‘return receipt requested’.
• Allow the instructor time to respond. If you send an email or post a message on the weekend or on a weekday late afternoon, do not expect an instructor’s response until the next business day.

XV: Academic Success and Disability Support Services

Please feel free to talk to your instructor anytime about your performance in the course or possible ways you can improve. Excellent references are available on the web and there are support texts in the library and classroom. I encourage you to organize study groups with your fellow students.

If you need disability-related accommodations, please notify the KOKUA Program (808) 956-7511. E-mail: kokua@hawaii.edu
