1. PURPOSE

To provide a means of inspecting fire stations and safety equipment between annual inspection intervals.

2. SCOPE

This procedure applies to Deck Department.

3. RESPONSIBILITY

The Third Mate or his/her designee is responsible for a weekly inspection of all fire stations and Safety equipment.

4. PROCEDURE

4.1 Fire station and safety equipment are required to be maintained in a ready status at all times in case of an emergency. Although KILO MOANA has USCG inspection requirements to meet, as well as ABS and UMC requirements, it is imperative that the ship make more frequent checks to ensure that our equipment is in working order at all times.

4.2 As part of the ships maintenance system, the Third Mate will inspect all fire stations monthly, correcting all discrepancies and/or reporting their condition to the Chief Mate.

4.3 Keep the Chief Mate or Master informed of all inspections that may be coming due, i.e., fire hoses, portable extinguishers, etc.

4.4 The Third Mate will maintain a maintenance record of Safety Equipment, including inspection dates.

4.5 The monthly inspection of all Fire Stations and safety equipment shall be carried out with the following exception: The entire Fire Station and safety equipment check off shall be automatically deferred for a period of one month prior to entering an upkeep period in a shipyard, during the entire period in the shipyard and for one month after the shipyard. Entries are made in the Safety check off Manual to this effect.
