## ***R/V Kilo Moana* Scientific Party Berthing Policy**

### **1. Purpose**

The purpose of the *R/V Kilo Moana* Scientific Party Berthing Policy is to define the permitted times for embarkation/disembarkation of members of the scientific party which has chartered the *R/V Kilo Moana*.

### **2. Policy Scope**

All members of the scientific party which has chartered the *R/V Kilo Moana* must adhere to this policy.

### **3. Policy**

**TIMES FOR EMBARKATION/DISEMBARKATION.** In Honolulu, a vessel is not chartered (paid for) while in port. In a port other than Honolulu, the vessel is chartered through a port stop. Because of this, there are different rules regarding when members of the scientific party may live on board the vessel.

**Moored In Honolulu.** Normally, members of the scientific party will not move on board ship until after the evening meal on the day before the ship is scheduled to get underway. Upon return to Honolulu, members of the scientific party will be required to move off the ship prior to the noon meal on the day of return if the ship returns prior to 0800. If the ship returns after 0800, the scientific party must be off the ship prior to 2000. The Marine Superintendent must approve all exceptions to this policy.

**Moored In A Port Other Than Honolulu.** In ports away from Honolulu, the off-going party must clear the vessel by 2000 on the last funded day. The oncoming party may board after 0800 of the first funded day. The Master must approve any exceptions to this policy.

### **4. Responsible Officer**

Master, *R/V Kilo Moana*

### **5. Policy Effective Date**

May 1, 2009
