

Table III-2. Percentages of various meteoritic classes (top row) and percentages of spectral types of asteroids in each given asteroid belt or family.

Meteorites (674)			CC	Oc	EC	Achon.	Iron	Stony-Iron
			4.2	79.6	1.6	8.3	5.1	1.2
Asteroids	D	P	C	S	E	A	M	
Apollo+Amor (19)			5	79		11	5	
Hungaria (12)				42	58			
Mainbelt I (112)		1	25	68	2	1	3	
Mainbelt II (136)		3	41	43	2	1	10	
Mainbelt III (130)	3	4	49	32		2	10	
Mainbelt IV (24)	21	33	42	4				
Hildas (21)	38	57	5					
Trojans (16)	88	12						

Number in each parenthesis represents the number of classified meteorite falls or classified asteroids in a given belt or family. Whether the S type asteroids really correspond to the ordinary chondrites (OC) or not needs further study.
