Oceanography Seminar

Barbara Gibson
SOEST-at-large Assistant Specialist,
C-MORE Scholars Program Manager
University of Hawaii

Barbara Bruno
SOEST-at-large Specialist,
C-MORE Education Director
University of Hawaii

"C-MORE Education"

The Center for Microbial Oceanography: Research and Education (C-MORE) is a multi-institution NSF-sponsored Science and Technology Center based at the University of Hawaii. C-MORE's "K through gray" education programs serve a range of audiences, including pre-college students and teachers, undergraduate and graduate students, and post-docs. Barbara Bruno will provide an overview of C-MORE education programs. Barbara Gibson will present the C-MORE Scholars Program, which provides undergraduates majoring in an ocean or earth science-related field, especially underrepresented students such as Native Hawaiians and Pacific Islanders, the opportunity to participate in hands-on research experiences.

Thursday August 25, 2011 3:00 p.m. MSB 100
