

OCN791 – Scientific Proposal Preparation and Evaluation

Oral Presentation of Project

Due: Oct 20, 22 or 27, 2008 (sign up for a time slot)

Length: 7 minutes, 3 minutes questions

Assignment:

Based on your written proposal, prepare and present a ~7 minute talk on your research proposal to the class. The presentation should include the major components of your written proposal including background / motivation, hypotheses/goals, research to be done, methods and broader impacts. You do not have to include a budget or other ancillary information (eg. forms). Although the format of the presentation is at your discretion, a Powerpoint-style presentation with ~5 slides is suggested. These slides should include all of the figures and tables used in your proposal. A PC computer, LCD projector and laser pointer will be provided.

Presentations will be evaluated on content and clarity by your fellow students.
