

The titles, authors, and abstracts of all Oceanography Department M.S. theses and Ph.D. dissertations (dating back to the 1960s) are now available on our website:
<http://www.soest.hawaii.edu/oceanography/gradstudies.html> .

These documents represent a vast amount of research, some of which is not available in the published scientific literature. This new listing of titles, authors and abstracts can be easily searched using a web browser, and it is hoped that this new resource will help keep old but useful research from disappearing from the oceanographic community.

Many of these volumes are available at the UH Hamilton Library in either paper or electronic format. If they are not, our archival (bound) copies can be examined and/or photocopied in the Oceanography Office. However, because of their irreplaceable nature, bound volumes cannot leave the Oceanography Office without the specific permission of the Department Chair.
