

<p><b>Pagan Island BPI Structures</b> 10-m grid cell size</p> <p>NOAA PIFSC Coral Reef Ecosystem Division, Pacific Islands Benthic Habitat Mapping Center</p> <p><b>NOT FOR NAVIGATION</b></p>	<p>UTM, Zone 55N, WGS84</p>	<p>Pagan Island Bathymetric Position Index (BPI) Structures are derived from two scales (50 and 250) of a focal mean analysis on bathymetry and slope to predict reef structures. Shelves are defined here as those at depths above -60m while deep shelves are found below -60m. These definitions are based on the presence of a shelf and distinct drop off at -60m on the southwest side of the island. Grayscale elevation data, in meters, are courtesy of USGS. See metadata for more information.</p>
