

## Pagan Island BPI Zones

10-m grid cell size  
NOAA PIFSC Coral Reef Ecosystem  
Division Pacific Islands Benthic  
Habitat Mapping Center

**NOT FOR NAVIGATION**

Universal Transverse Mercator Projection, Zone 55N, WGS84

Bathymetric Position Index (BPI) Zones are derived from a focal mean analysis on bathymetry & slope. The BPI scalefactor 250 was used, based on measurements of key reef features evident in the bathymetry & hillshade (see discussion in metadata). Two ranges of slope defined flats & slopes:  $x < 5$  and  $x > 5$  respectively.
